

**Dates: One week program**

## **ICT in every classroom**

"ICT in every classroom" is a training on how to incorporate Information Technology into everyday teaching. Since teaching methods change almost every year, and students' needs and interests change year by year, the teachers need to use different teaching techniques to attain students' interest and to help them gain as much knowledge as possible. By using ICT in everyday classes teachers could make their lessons more interesting for the students. During the course they will learn how they could use ICT tools in teaching different courses, like English language, maths, economics, history, law etc. The participants will learn how to use You Tube videos in the classes, how to create interactive presentations, how to create quizzes in different applications (Kahoot, Quizzes, Studystack etc).

In the second part of the training, the participants will learn about Internet of Things, Smart car, IT systems, 3D printing. During the one week the participants will attend classes in order to see the real implementation of these IT systems and tools in everyday teaching and learning.

### **SUNDAY**

Arrival of the participants

### **MONDAY**

9:00 - 10:00

Course Introductions

What technologies do you use in your classroom?

10:30 - 12:30 Attending IT classes – Auto CAD/Graphic Design/Web Design

13:00 - 15:00

Guided Tour around Skopje

### **TUESDAY**

9:30 - 12:30

Visit of the Canyon Matka

13:00 – 15:00 IT workshop

IT System for detection of harmful gasses

IT System for improvement of solar panels

**WEDNESDAY**

09:30-11:00

Canva and Google slides- applications for creative learning

11:30-13:00

Attending IT classes – Power Point and Graphic Design

**THURSDAY**

09:30-11:00

3D printing

Internet of Things (IoT) and Smart car

11:30-13:30 Attending IT classes – Graphic design or Auto CAD

20:00 Dinner at traditional Macedonian restaurant

**FRIDAY**

09:30 – 11:00

Kahoot, Quizziz, Study Stack, Wheel of names, Class Dojo - applications for interactive classroom

11:30-13:30

Group work

What have we learned this week?

How can the IT tools be used in everyday classes?

Reflection and questions

Certificates of Attendance

Course Evaluation

**SATURDAY**

Cultural acitivity

Visit to city of Ohrid, city of Unesco

**SUNDAY**

Departure of participants
