

Institut Tecnològic de Barcelona, Spain

Job shadowing_ digitalisation in education in VET and HE degrees

Summary:

- The training course provides a thorough introduction to our school's programs and initiatives. Participants attend presentations, guided tours, and job-shadowing sessions to gain insights into our educational methodologies, including international mobility, project-based learning dual system management and GAP Gender in IT.
- The event also features interactive sessions for exchanging ideas with teachers and staff.
- A visit to the IHub showcases ongoing development projects.
- The course aims to foster collaboration, enhance professional knowledge, and provide a comprehensive understanding of our school's operations.

Learning Outcomes:

- Understand the Structure and Vision of the School: Gain insight into the school's management, its educational philosophy, and the variety of programs offered.
- Familiarize with Key Projects and Initiatives: Learn about the school's projects in international mobility, project-based learning, and the dual system of management, including their implementation and impact.
- Experience Practical Applications: Through guided tours and jobshadowing, observe the practical applications of the school's methodologies in real-time settings, including classrooms, collaborative robotics, and tutor rooms.
- Engage and Network with Staff: Exchange ideas with teachers and staff, fostering collaboration and gaining diverse perspectives on educational practices.

- Learn from Experts: Attend a MasterClass that provides deeper insights into specialised areas of interest, enhancing professional development and knowledge base.
- Explore Development Projects at IHub: Visit the IHub to understand the innovation and research projects currently in development, broadening awareness of cutting-edge educational practices.
